

UNILIGHT

DESIGN 2011
catalogue

Dear Lighter friend,

We are happy to present you our latest design catalogue. As you will see we have invested again in many nice designs and techniques to make our lighters even more attractive.

It has been our first interest to supply you with attractive products which will increase our mutual sales opportunities.

The main quality item will be our MAJOR M5 Safety lighter with safety flame and a huge tank content of 2,0 grams, in many good colours and contemporary designs.

The real power you will get from our new turbo lighter in 5 trendy colours.

New natural fragrances will reveal smelling moments in our new scented lighters.

The new Bergamo in various modern colours and label versions will boost your sales with this alternative lighter type.

The Vancouver in blister version is a definite 'Look and Like' candidate and has been preselected by various big decision makers already now. The modern colours of our popular New York will give a colourful hint to the next spring and Summer months.

Metal will give good opportunities with our New Deal and our feminine design lighter Orléans.

We trust that you share our satisfaction with our wide choice of new types, colours and designs and wish you a delighte(re)d sales season.

Your Unilight team!

NEW
